- What documents are needed to send a shipment?

When making a shipment we need the following documents to ensure a smooth transit.

**You will need:**

- **a. Airway Bill**
- **b. Commercial Invoice**
- **c. Packing List**
- **d. To calculate the shipment weight**

- **d.i. Determine the actual weight**

Actual weight is the weight of the items in the bag, envelope or box if you put them on the scale and round up to the nearest kilogram (KG).

- **d.ii. Calculate the Volumetric/Dimensional Weight**

Measure your shipment's LENGTH x WIDTH x HEIGHT /5000. In the case of your shipments being in fractions, we will round to the nearest kilogram (KG).

- **d.iii. Determine the billable weight**

After taking both the actual weight of the shipment and the volumetric/dimensional weight of the cargo, the greater of the two will become the billable weight. This will be used to calculate the rate that will appear on the billing information.

- **e. How do I complete the paperwork? (Examples)**

We have prepared a number of examples of how to fill out the paperwork in the diagrams shown below. Should you have any further questions please feel free to ask your FRAYTE Logistics Representative for further information.

**d. What is the transit time of my goods?**

Please refer to the rate and transit time zone card.

**e. What is the maximum weight?**

70kgs per piece.

**f. What is the maximum length of any one single package?**

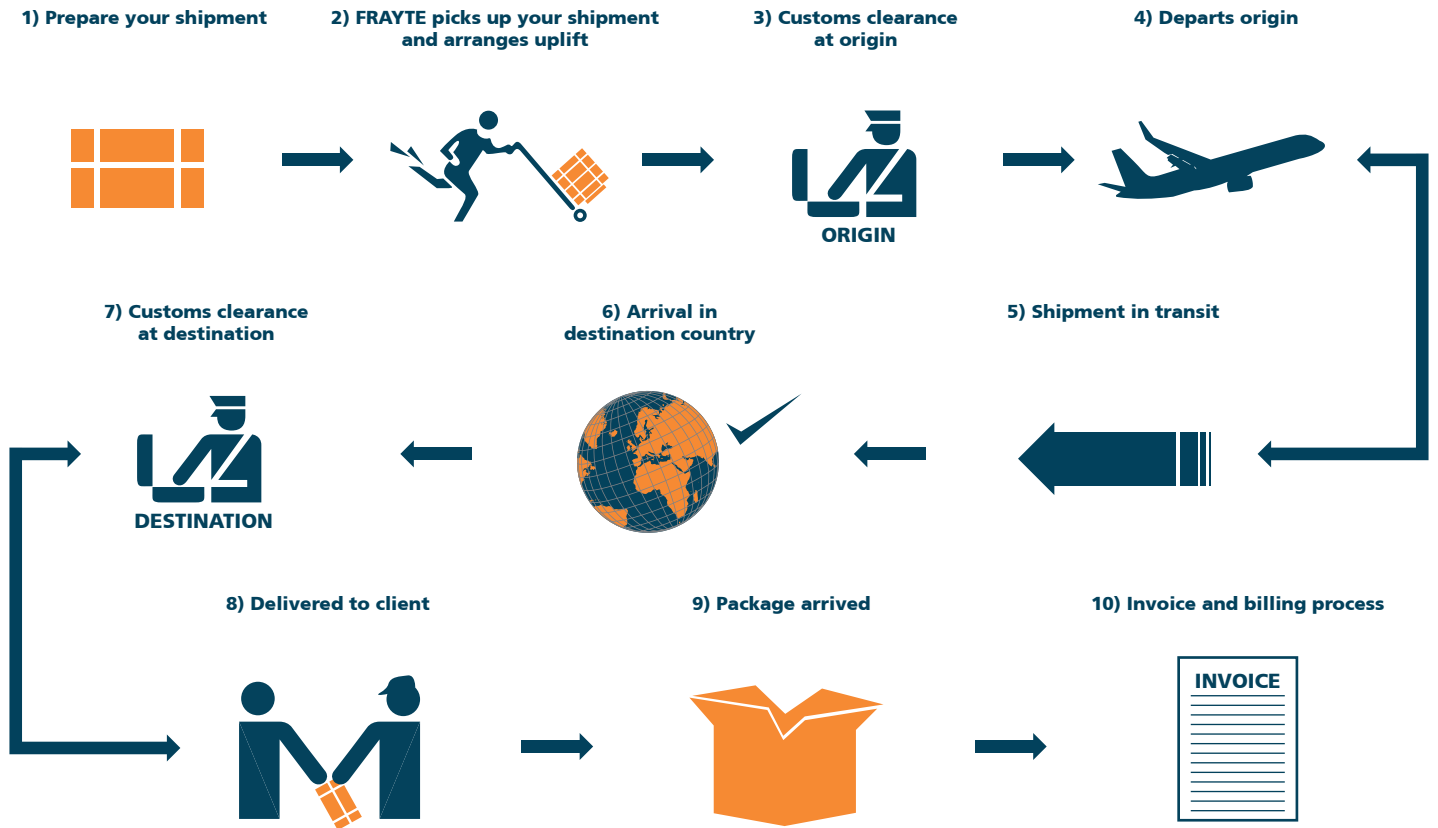

270cm in length.
